

**A new module for the software suite Head-count:
Holidays Plan WEB**

A new software for time & attendance and workflow programs is now available.

It allows an excellent management of firm's holiday schedules / workgroup bodies.

The module is set on a WEB base, where every employer can enter his/her holiday schedule pertaining to a certain year, at the same time the manager can check it using just one window or print the daily sheet of each department he is liable for.

It's also possible to obtain the annual view of every absence type or if a range from date to date.

The firm's holiday schedules is separated from the standard database of ht e program. Only when a manager decide that the plan can be accepted, the data can pass from the holiday plan to the working database.
